Caracas, May 26th, 2015

Dear EC members

As supervisor of the Terrestrial Processes, Deposits and History –TERPRO-Commission, I can now inform on the election of the Commission President for the period 2015-2019.

You may well be aware that two candidates had been proposed to run for Commission President for the term 2015-2019:

- a) The current TERPRO Commission President, **Dr. Alessandro María Michetti** (Università dell'Insubria, Como, Italy) and
- b) **Dr. Nick Lancaster** (Desert Research Institute, Reno, Nevada, USA);

reason for which this election had to be run.

I contacted every single member of the TERPRO mailing list by a letter distributed electronically on May 06, asking each member of the commission to provide their choice by midnight (GMT) of **May 22, 2015**; in other words, last friday.

After counting the votes, **Dr. Alessandro María Michetti** has been ratified as TERPRO Commission President for a new four-year period starting at The **XIX INQUA International Congress** being held in Nagoya, Japan, late July-early August 2015.

The final standings were as follows:

Dr. Lancaster: 12 votes

Dr. Michetti: 40 votes

When distributing the invitation letter to vote, I enlarged its distribution even to the members who had not confirmed to wish being member of the Commission for the new forthcoming period. These votes confirmed further the decision of the majority. Dr Michetti obtained 12 additional votes while Dr. Lancaster was voted three more times.

Wishing Dr. Michetti success in this new stage of his Presidency,

Yours sincerely

Franck A. Audemard M.
INQUA Vice-President
